JAMES BARTON LONGACRE NUMISMATIC & PRINTING PLATE COLLECTION

1818-1875

.18 linear feet, 2 boxes

October 2022
Descriptive Summary

Repository

Library Company of Philadelphia
1314 Locust Street, Philadelphia, PA 19107-5698

Creator

James Barton Longacre, 1794-1869

Title

James Barton Longacre Numismatic & Printing Plate Collection

Inclusive Dates

1818-1875

Quantity

.18 linear feet, 2 boxes

Language of Materials

Materials are in English.

Abstract

The collection consists of hub and die trials of various coinage designed by James Barton Longacre while at the United States Mint. Longacre designed at least ten coins while he was the Chief Engraver from 1844-1869.

Administrative Information

Restrictions to Access

The collection is open for research use and available at the Library Company of Philadelphia, 1314 Locust Street, Philadelphia, PA. Appointments must be made in advance. For more information or to make an appointment for the James Barton Longacre Manuscript Collection or the James Barton Longacre Graphic Arts Collection, please contact Erika Piola, Curator of Graphic Arts at epiola@librarycompany.org or call 215-546-3181.

The Library Company makes every attempt to provide access to the James Barton Longacre Numismatic Collection while safeguarding the objects. The Numismatic Collection is digitized and as a preservation measure, digital images may be used as surrogates for research purposes. Permission to view the die trials in person must be obtained in advance. For more information or to make an appointment, please contact Linda Kimiko August, Curator of Art & Artifacts at laugust@librarycompany.org or call 215-546-3181.

Acquisition Information

The James Barton Longacre Collection was purchased in 1948 from Maxwell Whiteman.
Processing Information
The collection was originally arranged by staff at the Library Company when it first arrived. A volunteer, Selma Kessler, created a finding aid for the materials from 2005-2007. In October 2022 the collection was formally processed by archivist intern, Alexis Jimenez. The James Barton Longacre Numismatic & Printing Plate Collection finding aid was made possible by the generosity of our Sponsor Kurt Brintzenhofe.

Preferred Citation
This collection should be cited as: [indicate specific item or series here], James Barton Longacre Numismatic & Printing Plate Collection, Longacre Collection, The Library Company of Philadelphia.

For permission to publish materials or images in this collection, contact the Coordinator of Rights and Reproductions, Library Company of Philadelphia, 1314 Locust St., Philadelphia, PA 19107-5698. Please include complete citation(s) when making a request. See the Library Company’s website, http://www.librarycompany.org/, for further information.

Biographical/Historical Notes
James Barton Longacre was born August 11, 1794 in Delaware County, Pennsylvania to parents Peter Longacre and Sarah Barton. Longacre’s mother, Sarah died while he was still very young and his father remarried. At the age of twelve, Longacre left home to seek work in Philadelphia. There he found work as an apprentice in a bookstore with John Fanning Watson (1779-1860). Watson saw the artistic talent that Longacre possessed and allowed him to end his apprenticeship with him in 1813. At this time, Longacre began an apprenticeship as an engraver with George Murray (d. 1822). While at Murray, Draper, Fairman, & Co. Longacre worked alongside his future predecessor as Chief Engraver at the U.S. Mint, Christian Gobrecht (1785-1844). At the company, Longacre earned a reputation for his skill in creating engravings after other artists’ paintings. Additionally, he engraved portraits of George Washington, Thomas Jefferson, and John Hancock that were used by the publisher John Binns in his facsimile of the Declaration of Independence. Longacre worked with Murray at his firm until 1819 when he left to start his own personal business.
Upon the start of his own engraving business, Longacre’s first important commission came in 1820 with the American edition of *Ree’s Cyclopaedia* published by Samuel F. Bradford. One notable engraving during this time period is of General Andrew Jackson by Longacre after a portrait by Thomas Sully (1783-1872). Joseph and John Sanderson requested Longacre to engrave illustrations for their *Biographies of the Signers of the Declaration of Independence*. The work done for the Sandersons would lead Longacre to create his own series complete with biographies and illustrations.

At nearly the same time as Longacre had planned to create his own series, James Herring (1794-1867) was planning something very similar. In the interest of not being competitors, the two men agreed to work together and *The National Portrait Gallery of Distinguished Americans* came to fruition. Despite Herring being an artist himself, much of the art and engraving fell to Longacre. He travelled the United States to sketch the political figures from life and was recognized by all for his talent as an artist, particularly for his portraits. It was during this time that Longacre befriended John Caldwell Calhoun (1782-1850), the South Carolina Senator and former Vice President. Calhoun would later become an advocate for Longacre’s position as Chief Engraver of the U.S. Mint.

Longacre married Eliza Stiles (1807-1850) in 1827. They had six children: Sarah (1827-1906), Andrew (1831-1906), James (1833-1903), Eliza (1837-1906), Orleans (1840-1920), and Phoebe (1850). Phoebe died two months after she was born and is not widely documented except in Longacre’s diary from 1850.

Due to the financial Panic of 1837 sales of *The National Portrait of Distinguished Americans* were low. This led to Longacre filing bankruptcy and necessitated his travel of the country to sell copies of the series. Later in 1837, Longacre established a banknote engraving firm with two partners John Draper and Charles Toppan.

In 1844, Chief Engraver at the U.S. Mint Christian Gobrecht died. With the support of John C. Calhoun, President John Tyler appointed Longacre as his successor in September 1844. On January 7, 1845, the United States Senate confirmed Longacre’s commission as Chief Engraver.

Gobrecht had recently redesigned every denomination of U.S. coinage prior to his death. This allowed Longacre to get acclimated to his new position as he had no experience as a die-sinker having specialized in engraving copper plates for illustrations. The director of the Mint, Robert Maskell Patterson (1787-1854), and the Chief Coiner, (Benjamin) Franklin Peale (1795-1870), were critical of Longacre’s inexperience, whose presence appeared a threat to their private business using Mint resources and machinery to create medals.

Conflicts between the men would continue. In 1849, Congress authorized a gold dollar and double eagle (twenty dollar) gold piece. Longacre opposed Peale’s desire to have the work outsourced and Patterson refused his request for assistance. To the detriment of his health, Longacre completed the double eagle dies. They were rejected by Peale, who complained to Patterson. Patterson wrote to the Secretary of the Treasury, William Morris Meredith (1799-1873), requesting the removal of Longacre for being incompetent in creating working dies. Longacre went to Washington to meet with Meredith personally and was asked for a written statement following Patterson’s request for his resignation in February 1850. The double eagle went into production in March 1850. Longacre’s wife passed away a few months later in May.

In 1851, Peale objected to Longacre’s design of the silver three-cent piece and persuaded Patterson to allow him to submit a design. The matter was settled by the new Secretary of the Treasury, Thomas Corwin (1794-1865), who chose Longacre’s design.

In 1854, Mint Director James Ross Snowden (1809-1878) fired Peale for his use of the Mint for private gain. The conflict Longacre endured during the Peale controversy ended.
While working as the Chief Engraver at the Mint between 1845 and 1869, Longacre was responsible for designing at least ten U.S. coins and several medals. Some of his most notable coin designs include the three-dollar gold piece, Liberty Head double eagle, Liberty Head gold dollar, Flying Eagle cent, and the three-cent piece in silver. In addition to his U.S. coin designs, Longacre redesigned five silver and four gold coins for Chile in 1866.

Longacre died on January 1, 1869 at his home in Philadelphia. He left behind a significant collection of work as a prolific portrait artist and engraver.

**Scope and Content Note**

This collection consists mostly of die and hub trials with a few engraving plates and two impressions of leaves in metal.

Judd number refers to United States Pattern Coins Experimental and Trial Pieces by J. Hewitt Judd.

Pollock number refers to United States Patterns and Related Issues by Andrew W. Pollock III.

Die trial is an impression from a die in a different metal to test a certain design or example.

Hub is a mirror image copy of a die in relief which is used to make “carbon copy” dies.
